

International Symposium on "Sustainable Construction"

Online meeting, September 3, 2020

Welcome to the 1st Edition of the International Symposium on "Sustainable Construction"

Dear Colleague, dear Student,

on behalf of the Directors Board, I am glad to invite you to attend the 1st edition of the International Symposium on "**Sustainable Construction**".

The Symposium is organized by the Department of Civil Engineering (DICIV) and the Department of Information and Electric Engineering and Applied Mathematics (DIEM) of the University of Salerno (UNISA), in cooperation with the Faculty of Civil Engineering of Riga Technical University (RTU), Latvia, **in the framework of the Sustainable Construction Community events.**

It will take place online on September 3, 2020.

Our partnership already organized two editions of the Summer School on Sustainable Construction (more information about the previous editions at the following links):

<https://www.rtu.lv/en/internationalization/international-events/summer-schools/archive-1/sustainability>

(I edition)

https://www.rtu.lv/lv/bif/Internac_sustainability

(II edition)

Due to the COVID emergency, the Directory Board decided to move the 2020 edition of Summer School to summer 2021, and to still give the opportunity to professors, scholars and students to meet and discuss about the important issues related to sustainability in constructions, during an online Symposium. The event will be enriched by the contributions of international professors and companies' experts that will present their latest results and applications in various branches of Architecture, Engineering, Environment and Physics. A detailed program of the event will be published soon. Please, follow the updates on

Website: <https://www.diciv.unisa.it/en/teaching/focus>

Facebook: <https://www.facebook.com/SustaCon/>

We look forward to receiving your application, sure that your attendance will be valuable for the success of the event.

Prof. Claudio Guarnaccia
Department of Civil Engineering
University of Salerno
Co-director of the Symposium

International Symposium on "Sustainable Construction"

Online meeting, September 3, 2020

Technical notes

Application deadlines and procedure

The deadline for the application is **July 31, 2020**.

You can apply to the symposium by email to sustainableconstruction2020@unisa.it, sending the **application form** filled in all its parts and signed electronically, together with the required documents.

Seats for students are limited and a selection will be performed in case of high number of applications. For this reason, we kindly ask to applicant students to attach to the application the Curriculum Vitae, in either English or Italian, with the most recent academic transcript (details about courses successfully attended and marks obtained).

This item is not required for professors and researchers.

The confirmation of acceptance will be sent by email to the applicants. Also the link and the password to join the event will be provided approximately one week before the event.

Registration fees

No fees are required. The event is financially supported by the University of Salerno.
